SUMMARY

- **Full-Stack Software Engineer** with proven expertise designing, building, and deploying **production-grade applications** using modern stacks and AI integration.
- Shipped **Intikhab-e-Zauj**, a live **production MERN platform** for Falah Khandan Center, featuring a transparent rule-based matching engine, an AI insights layer, and privacy-by-design architecture serving real users.
- Developed **Fluenti** healthcare platform leveraging multiple AI models (Google Gemini, OpenAI, Groq LLM), with real-time speech processing and a gamified therapy system.
- Specialized in the **MERN stack** (React, Node.js, Express, MongoDB) with TypeScript, real-time communication, LLM integration, and secure API design.
- Experienced in **multi-service cloud deployment**, CI/CD, JWT/2FA authentication, and WebSocket communication.

TECHNICAL SKILLS

Frontend: React, Next.js, TypeScript, Angular, Tailwind CSS, Framer Motion, Bootstrap

Databases: MongoDB (Atlas), MySQL, PostgreSQL, Fire-base

Cloud & DevOps: Render, Vercel, Cloudflare, Cloudinary, Heroku, AWS, Docker, CI/CD, GitHub Actions

Tools: Git, GitHub, VS Code, Postman, MongoDB Atlas, Resend

Backend: Node.js, Express.js, Python, Flask, REST APIs, WebSocket, GraphQL

AI & ML: Google Gemini, OpenAI, Groq, Whisper, RAG, Multi-LLM Orchestration, face-api.js

Languages: JavaScript (ES6+), TypeScript, Python, SQL, HTML5, CSS3

Core Concepts: REST, WebSocket, JWT/2FA, Role-Based Access, Prompt Engineering

EXPERIENCE

Full-Stack Software Engineer — Intikhab-e-Zauj

2026 – Present

Falah Khandan Center — Guided Matrimonial Platform

Remote / Lahore

- Architected and shipped a **production MERN platform** (React, Express, Node.js, MongoDB, TypeScript) end to end — data model, REST API, frontend, and deployment.
- Designed a transparent **rule-based matching engine** (hard filters + weighted 100-point scoring), with an **AI insights** layer (RAG + multi-provider LLM) that assists staff without replacing human decisions.
- Engineered **privacy-by-design**: server-enforced photo access control with per-consent reveal, plus automatic on-device **face verification** on upload.
- Built a **Cloudinary media pipeline** (crop, face-detect thumbnails, full-image viewer) and secure **payments** (Safepay checkout + bank-transfer verification with staff review).
- Implemented **JWT authentication**, **role-based access**, **audit logging**, and a moderated proposal/chat workflow; migrated **~971 records** via a custom import pipeline.
- Deployed a **6-service production stack** (Vercel, Render, MongoDB Atlas, Cloudinary, Resend, Cloudflare) with uptime monitoring and automated cold-start mitigation.

Full Stack Developer & AI Engineer

Jul 2025 – Dec 2025

Fluenti — AI Speech Therapy Platform

Lahore, Pakistan

- Architected a full-stack healthcare application serving real users, with secure authentication and a resilient deployment.
- Integrated **Google Gemini**, **OpenAI Whisper**, and **Groq LLM** for personalized AI-driven therapy recommendations and speech processing.
- Built a **real-time speech recognition** system using WebSocket communication for seamless interaction and instant feedback.
- Implemented secure authentication with **JWT and 2FA (TOTP)** with HIPAA-aware design.

- Designed a gamified therapy system with 20 difficulty levels and a progress-tracking dashboard, improving engagement and retention.
- Deployed on Render with a CI/CD pipeline and automated monitoring; built 25+ responsive features in React, TypeScript, and Tailwind CSS.

PROJECTS

EcoMate — Sustainability Tracking Platform

2025

Personal Project — MERN, Chart.js, D3.js

- Built a full-stack **MERN** application enabling users to track and reduce environmental impact through data visualization.
- Implemented real-time dashboards using **Chart.js** and **D3.js** for carbon-footprint analytics and insights.
- Developed an algorithm-based **carbon footprint calculator** and a personalized insights engine generating sustainability recommendations from user behavior.
- Designed a RESTful **Express.js** API with a clean, responsive React frontend.

EDUCATION

Bahria University

2022 – 2026

Bachelor of Science in Computer Science

Lahore, Pakistan
